B. TECH (IT/CE/CSE/AIML)

Subject: Advanced Web Development Frameworks (ITUE301) | Semester: 5th

Practical Statement:

Create a React application using Vite for a student portfolio page. The application must include at least 4 reusable components: Header, About, Skills, and Footer. Each component must be independently structured and composed into a single-page layout. No logic or JSX should be duplicated across components. Props must be used to pass at least one piece of data into a minimum of 2 components.

Screenshots:

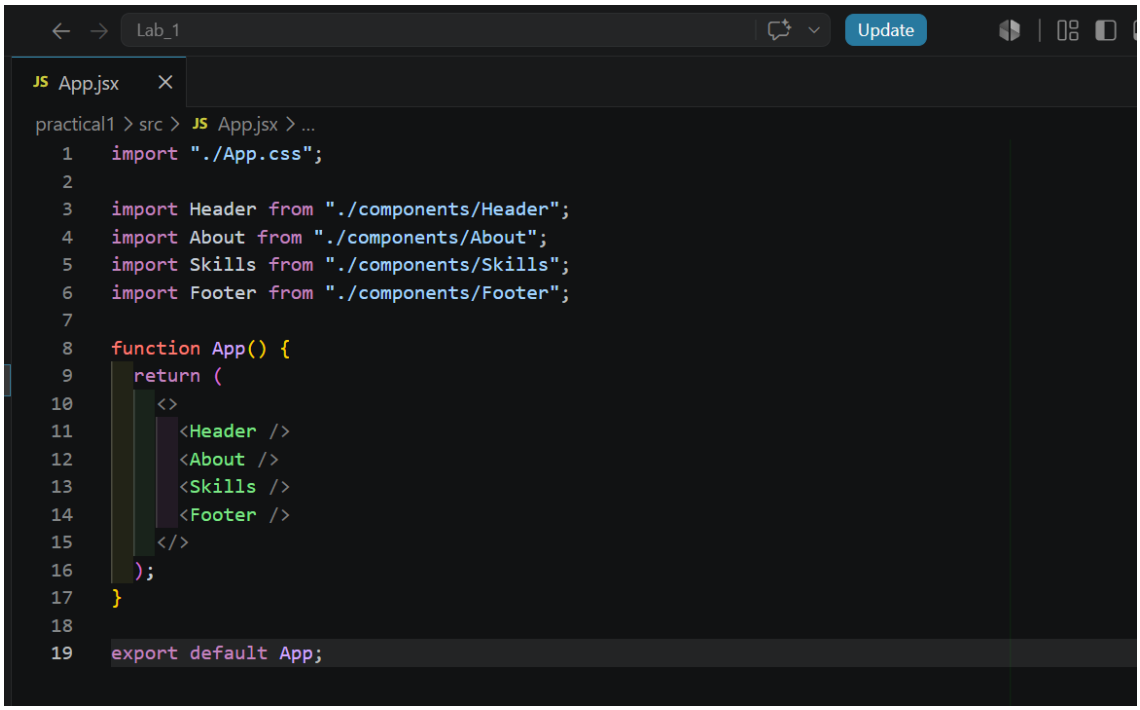

Figure 1App.jsx: the main app component importing Header, About, Skills, Projects, and Footer; defines skillList and projectList data arrays and assembles the page layout, passing props like themeColor and skillList to child components.

Figure 1.3 About.jsx: a functional component rendering an "About Me" section with a paragraph describing the student's learning experience.

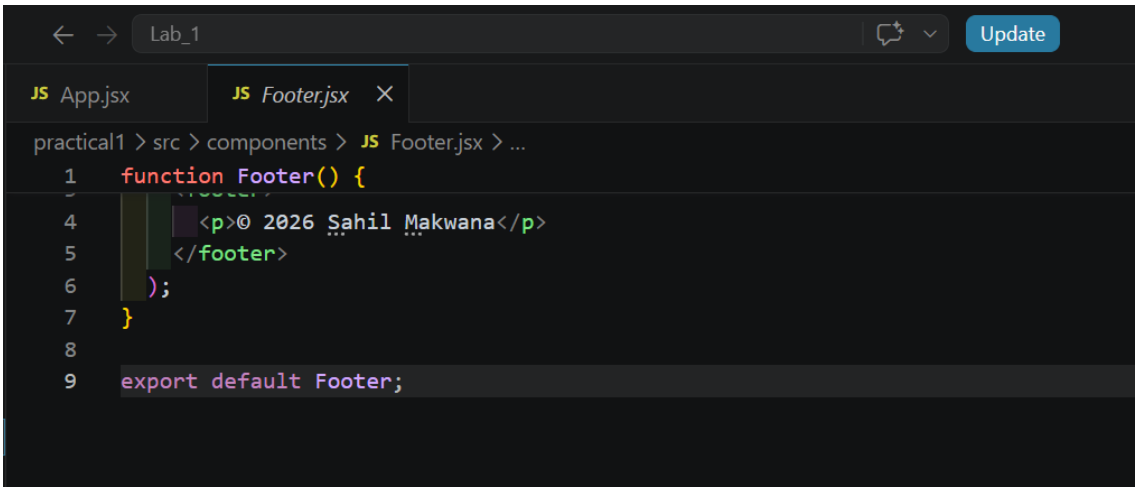

Figure 1.4Footer.jsx: a simple functional component rendering a footer with the text "Student Portfolio. Built with React and Vite."

Figure1.5Header.jsx: a functional component accepting a themeColor prop (default #0f172a) to style the header background, displaying a title and welcome message.

Student ID: 24IT045

Figure 6Projects.jsx: a component that accepts a projects prop and maps over it to render a list of project titles and descriptions.

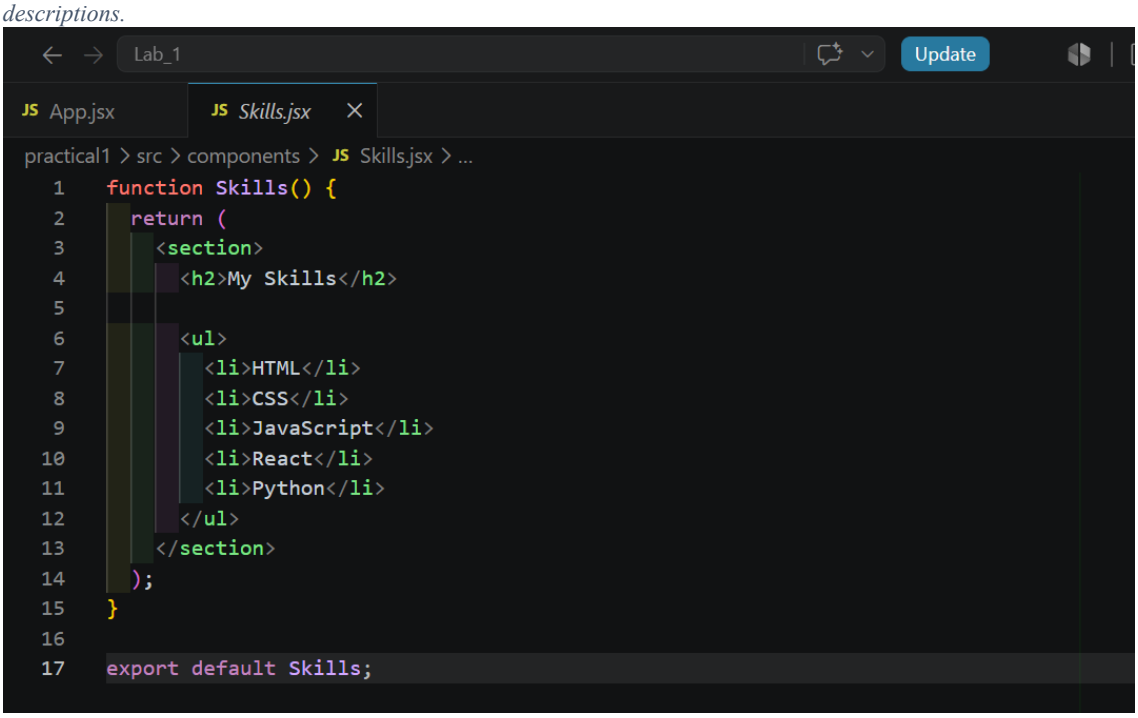

Figure 1.7 Skills.jsx: a component that accepts a skillList prop and maps over it to render a bulleted list of skills.
